

Pad DL-VCMA *Plus*™

PAD SERIES DOUBLE-LATCH VERTICALLY COMPLIANT MANUAL ACTUATOR

Your Solution for Characterization Test

The Double-Latch Vertically Compliant Manual Actuator *Plus*™ (DL-VCMA *Plus*™) features improved ergonomic, thermal, electrical and mechanical performance to help lower your cost of test.

Features/Benefits

Simple, One-Handed Operation

- Actuator latches onto contactor and engages package automatically when knob is turned
- New more ergonomic easy-grip knob for easier and smoother operation

Vertical Actuation of Contacts

- More consistent package contact
- Improved coplanarity
- Reduced X-Y movement on package

Versatile Leadbacker

- Vertically Compliant, one leadbacker can be used for a variety of package thicknesses

Better Airflow to Package

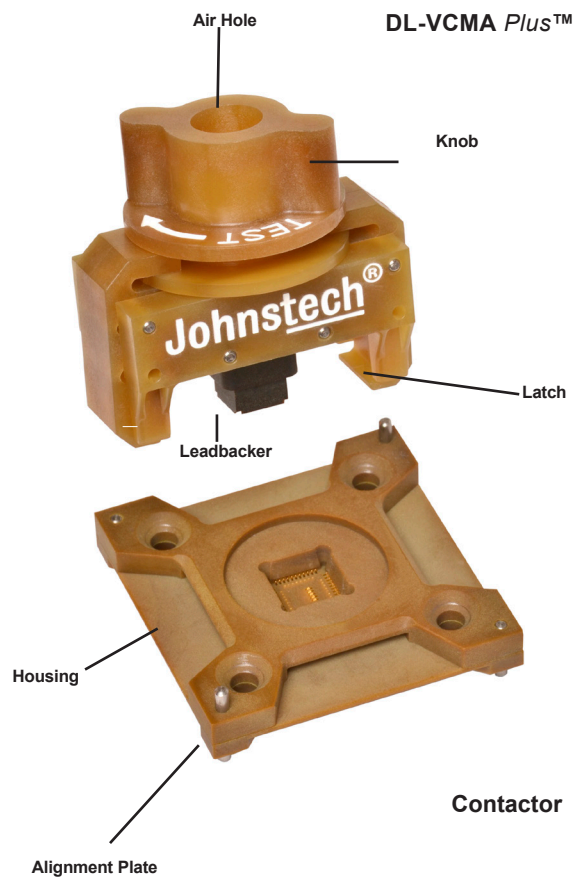

- Center holes in leadbacker and knob ensure better temperature control

Specifications

Material: Ultem®

Operating Temperature: -55° to 155°C

Values are based on controlled test conditions and may vary based on application.
